Adobe Dreamweaver CC: Part 1

Course Duration: 1 Day

Course Description:

You want to create and maintain web pages for your website. The fundamental elements of a web page are HTML, XHTML, CSS, and some JavaScript. These technologies take some time to master. In this course, you will use Adobe Dreamweaver to create web pages, focusing on the content, styling, and design. As you construct the web pages, Dreamweaver will competently create the XHTML, CSS, and JavaScript required.

You will also maintain and administer your website with Dreamweaver's site and page management tools. The website and pages you create will reflect your content and design and will be professionally accurate for your site visitors.

This course covers the Web Authoring Using Adobe Dreamweaver CC objectives to help students prepare for the Adobe Certified Associate (ACA) exam. This course is also designed to cover the Adobe Certified Expert (ACE) exam objectives.

Course Objectives:

Upon successful completion of this course, you will be able to:

- Identify Dreamweaver fundamentals

- Create websites

- Create web pages

- Insert tables and import content into web pages

- Create reusable site assets

- Link web pages and send the website to the server

Target Student:

This course is most valuable for individuals who have been given responsibilities to create or maintain a website. It will also be valuable for new web designers, web developers, and graphic artists who want to extend their skills in creating complete websites. Learning how to use Dreamweaver CC will enable the practitioner to create web pages and sites in the most efficient manner.

Prerequisites:

To ensure your success in your course, you should have basic computing skills. Familiarity with various web design technologies is helpful.
